- Case studies
- Group work
- Role plays

Certificate

KLU Executive Education Program Certificate

OBJECTIVE

The growing interconnectedness in today's world combined with accelerating change processes have created a dynamic and complex environment which places immense demands on organizations operating in the humanitarian space. In this context, supply chain management is increasingly recognized as critical success factor for short term aid deliveries as well as long term development programs.

This executive program will build your competency and knowledge to tap into the enormous potential that supply chains offer to organizations and the entire sector to ultimately do more with less.

You will be challenged to think strategically and out of the box across sectors and in different operational contexts. By the end of this program you will be equipped with an extensive skill and tool set provided by experts with commercial and humanitarian experience combined with the best academic knowledge this field has to offer.

CONTENTS

Day 1. Supply Chain Integration and Advocacy

Day 2. Organization Strategies and Supply Chain Design

Day 3. Leadership and Change Management

Day 4. Network and Partnership Management
