OVERVIEW

Tap into the potential of supply chain management for organisational and operational success.

Climate change, economic inequity, access restrictions, geopolitics and health crises have created a ‘perfect storm’ sharply increasing the demand for humanitarian assistance.

This executive programme, developed in partnership with the Kühne Logistics University (KLU), aims to equip directors and managers operating in the humanitarian context with the competency and knowledge required to meet the immense demands placed on supply chain leaders in the sector.

Participants will be challenged to think strategically and out of the box across sectors and in different operational contexts. By the end of this program, participants will be equipped with an extensive skill and tool set provided by experts with commercial and humanitarian experience combined with the best academic knowledge this field has to offer.

Executive Training on Supply Chain Management in the Humanitarian Context

METHODS

- Interactive lectures
- Panel discussions
- Group work
- Board games

LEARNING OBJECTIVES

- Learn to align your supply chain design with your organisation's strategy.
- Understand human motivation and its implications for team management.
- Learn to manage supply chain complexities in alignment with the sustainable development goals.
- Explore ways to unlock the power of public and private partnerships

REVIEWS

"From supply chain design to looking at the effects of climate change on supply chains, the training covers knowledge-rich topics that are important for the work that we are trying to do in the humanitarian sphere. It is also a great opportunity to network with people and have that critical mass of learning and knowledge exchange that would be applicable in our organisations."

PATRICK TEIXIERA

Deputy Country Director, WFP Timor-Leste

TARGET AUDIENCE

Directors and managers of organisations operating in the humanitarian space.

COURSE OUTLINE

Module 1: Supply Chain Integration and Advocacy

- Breaking the vicious cycle of disasters, poverty and vulnerability
- Advancing multi-sector engagement and collaborative action
- Benefiting from innovations, research trends and developments of modern supply chains

Module 2: Sustainable Operations

- Understanding sustainable development and evaluating the limits for and the potential of organisations towards sustainability
- Dealing with trade-offs in sustainability strategies and operations
- Enabling organisations to effectively embrace sustainability in logistics operations

Module 3: Leadership and Change Management

- Leading organisations and supply chains in times of crises
- Enabling collaboration across silos and boundaries
- Motivating individuals to change and learn

FEES

We provide training opportunities free of charge in the humanitarian sector. Contact us to discuss sponsorship options.
